Important Note:

Websites that end in: .Gov,.org, .edu or.ca are the most reliable websites.

- **.gov** --- Government agency sponsored
- **.org** --- Non-profit agency sponsored
- **.edu** --- Academic Institution sponsored
- **.ca** --- Country sponsored
- **.com** --- For-profit company which may be selling a product.

Criteria for Evaluating Internet Health Information

- **Credibility:** includes the source, currency, relevance/utility, and editorial review process for the information.
- **Content:** must be accurate and complete, and an appropriate disclaimer provided.
- **Disclosure:** includes informing the user of the purpose of the site, as well as any profiling or collection of information associated with using the site.
- **Links:** evaluated according to selection, architecture, content, and back linkages.
- **Design:** encompasses accessibility, logical organization (navigability), and internal search capability.
- **Interactivity:** includes feedback mechanisms and means for exchange of information among users.
- **Caveats:** clarification of whether site function is to market products and services or is a primary information content provider.
